Project Failure rates in africa

IT ACCESS TEAM

PROBLEMATIC

What is the most important problematic to solve

? MISMANAGEMENT

Projects in Africa fail not only because of financial issues but also because of mismanagement and the lack of knowledge about how to analyze my needs, my customer needs, the suitable time to implement my project, and especially the suitable **"where"**

DESIGN THINKING PROCESS

Empathize

we gain an empathetic understanding of the problem we're trying to solve, people with emerging projects may lose a lot of money and efforts ..

Define

the core problem is defined after creating some personas: analyzing cases and figuring it out! the place of your project is the most important parameter to make a successful project

Ideate

Brainstorming guides us to find a strong solution for people who want to make sure that their project will be successful. with "THE NEW MENA"

Prototype

As you all see we started the model and we will for sure ameliorate our services and improve our the work

Test

We are excited to test our project and help enterpreneurs grow their business

SUSTAINABILITY AND SCALABILITY ARE WHAT WE AIM FOR

THE NEW **MENA**

THANK YOU !
